MICHIGAN CHRONICLE 40 UNDER 40

NAACP DETROIT BRANCH

DETROIT, MICHIGAN

Jermaine Peguese

Detroit. The city that built a penny candy entrepreneur under a blue tarp roof.

Jermaine Peguese. President and CEO of Pathworth Consulting and Solutions. The Chairman of AI.

Chairman, because he built a whole movement around what these tools are actually for before most people started paying attention. He taught himself, starting in November 2022, sharpened it through the ChatGPT and Generative AI for Management Consultants program, and built his own AI workforce without writing a line of code. And because he spent years putting that same structure under people in boardrooms, church halls, and youth programs. Same hands on every one of them.

Underneath the titles, he's an institution builder. One mission since he was a kid selling penny candy: put people in position to win, whatever that win is for them. For years he did it from behind the scenes, with no name attached.

At the NAACP Detroit Branch, he's the Special Projects Manager. As Senior Project Manager of the Fight for Freedom Fund Dinner, he runs the largest sit-down dinner in the world: 4,000+ guests, and a sitting President on the stage his first year. He took over BRIDGES and puts 14-to-24-year-olds to work every summer. He created Digital E.T.A., the small business program where one woman made over \$10,000 from a single idea.

As Founding Chapter President of Recession Proof Extreme Michigan, he grew an entrepreneurship community from 19 members to 125+ and brought home Chapter of the Year and Model Chapter of the Year.

The same mission wearing different clothes. In 2026, the Michigan Chronicle named him to its 40 Under 40.

Four things make him who he is. Strategy: he always has a plan. Instincts: he stays calm when the room shifts. Logic: he thinks it through. Heart: he stands behind people until they win.

He's already proven. Whatever you've got going on, run it by Jermaine.

SHORT BIO

Jermaine Peguese is The Chairman of AI, and the President and CEO of Pathworth Consulting and Solutions. He taught himself AI, starting in November 2022, and built his own AI workforce without writing a line of code. Before AI, he spent twenty years putting people in position to win, from the largest sit-down dinner in the world to a summer program that puts young people to work. Now he brings both worlds into one room.

He builds with AI every day

An AI workforce he designed, built, and trained runs his business, from the agent that answers his inbound line to the one that prices multimillion-dollar construction estimates. He wrote a 45-module curriculum to teach people to stay in charge of it.

He calls AI a guessing machine. It predicts the next word and has no fact-checker inside, so the person reading the output is the only checkpoint. He teaches people to catch when it lies, guard their own data, and own every word that goes out under their name.

He has taught AI from church pews and summits to nonprofit offices. Since 2019 he rebuilt and designed the B.R.I.D.G.E.S. summer youth program, putting 75-plus young people into jobs. People walk in nervous and leave with something they can use the next morning.

AT A GLANCE
